# Splicecom SelectVoice

## UC

**Native support for Yealink's T4 SIP Phone and T5 Prime and Smart Business Phone families on the SelectVoice 1000 platform significantly widens Splicecom's portfolio of Unified Communication devices for the desktop.**

From low-cost, entry-level SIP phones, all the way up to video conferencing devices running on the Android OS; there will always be the ideal phone to fit your specific requirements and needs. Splicecom's significant investment in feature integration lowers the cost of entry where customers want an 'everyday' office feature set. It also delivers significant value add to the large wave of hosted customers whose initial 3-year term is coming to an end and who want to keep their existing Yealink handsets, but change their voice service provider/platform.
